

CALL FOR TUTORIALS

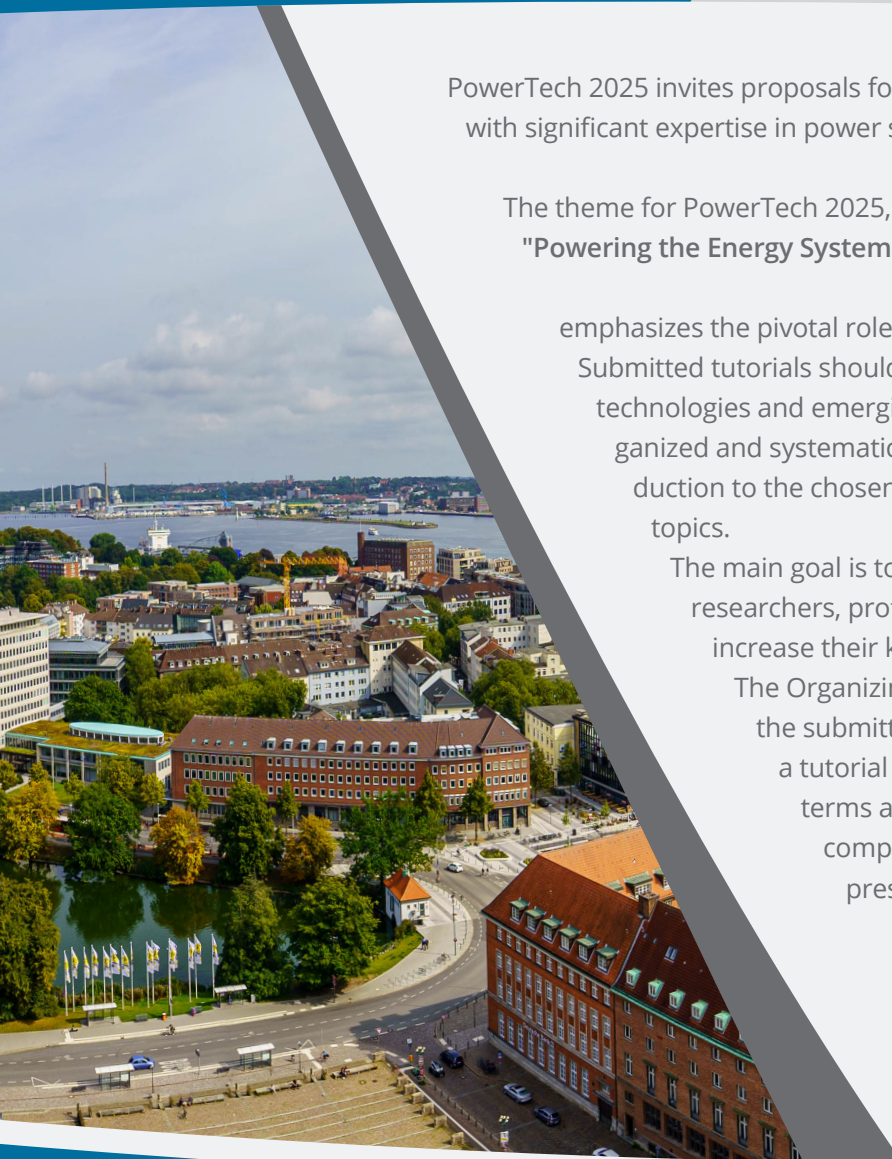

PowerTech 2025 invites proposals for tutorials from scientists and professionals with significant expertise in power systems and the energy domain.

The theme for PowerTech 2025, "Powering the Energy System Transformation,"

emphasizes the pivotal role of innovation for future energy systems. Submitted tutorials should provide the audience an overview on new technologies and emerging trends. Each tutorial should have a well-organized and systematic presentation, including an appropriate introduction to the chosen area and in-depth coverage of advanced topics.

The main goal is to attract a broad audience, including students, researchers, professionals, and experts—anyone who wants to increase their knowledge in the selected tutorial topics.

The Organizing Committee of PowerTech 2025 will review the submitted tutorials and make the final selection. Once a tutorial is chosen, the presenters must agree to the terms and conditions noted in the agreement on compensation and materials for PowerTech tutorial presenters.

PRESENTER(S) AGREE TO

- Display presenter information and company logo on the first and last slides only.
- Permit the PDF version of slides to be distributed to registrants.

MORE INFORMATION

- For more information or questions regarding the tutorial submission process, please contact the tutorial chairs
- Prof. Hossein Imaneni; Christian Albrechts University Kiel, hi@tf.uni-kiel.de
- Prof. Timm Faulwasser; Hamburg University of Technology, t.faulwasser@tuhh.de

REVIEW CRITERIA

The Organizing Committee will evaluate proposals based on criteria such as:

- Timeliness and relevance
- Clarity and organization of the tutorial content
- Expertise and experience of the presenters
- Potential to attract and engage a broad audience

We look forward to your innovative and insightful proposals
